The diary intends to work with trade among researchers and medical services experts to improve the act of medication and backing advancement in every aspect of the subjects.

AJMS is focused on the two professionals and specialists and distributes unique papers, short correspondences and case arrangement, just as exceptional audit articles. The points and extent of the diary incorporate the accompanying:

To distribute articles that consider the best in class in cutaneous science and dermatology by giving unique logical compositions, just as a total basic audit of the dermatology writing for clinicians, learners, and academicians. To bring perusers state of the art data in medication and medical procedure. To distribute academic articles on issues of fundamental and applied science, adroit case reports, clinical schooling, and top to bottom surveys, all of which give hypothetical system to experts to make sound reasonable decisions. To make the main advancements in the fields of medication and medical procedure effectively open to the clinician by introducing all around picked, elegantly composed, and exceptionally coordinated data in an organization that is intriguing, plainly introduced, and valuable to patient care. To set up a completely on the web, peer-investigated open access diary with a worldwide standpoint and spotlight on those preparation in medication and medical procedure. The diary is proposed to contain a blend of unique clinical and essential science research, audits, publications, analysis, points of view, banter, assessment, case reports and so on. The diary crosses the entire infection range of medication and surgery. All articles

distributed by this diary are made openly and forever available online quickly upon distribution, without membership charges or enrollment hindrances. All works distributed by this diary are under the conditions of the Creative Commons Attribution License (CC-BY).

Writers of articles distributed in this diary are the copyright holders of their articles and host allowed to any third get-together, ahead of time and in ceaselessness, the option to utilize, recreate or scatter articles. Companion survey is the framework utilized by African Journal of Medicine and Surgery to evaluate the nature of an original copy before it is distributed. Qualified specialists in the pertinent exploration region survey submitted compositions for creativity, legitimacy and importance to assist editors with deciding if the original copy ought to be distributed or not.

It's anything but a twofold visually impaired companion survey framework, where the commentators of the paper will not become more acquainted with the character of the author(s), and the author(s) will not become more acquainted with the personality of the analyst. The benefit of twofold visually impaired friend survey is that it dispenses with predisposition.

Compositions submitted to this diary will for the most part be assessed by at least two specialists who will be needed to assess whether the original copy is logically strong and intelligent, regardless of whether it copies previously distributed work, and whether the original copy is adequately clear supposed to be available for public viewing. The Editors will arrive at a choice dependent on these reports and, where important, they will talk with individuals from the Editorial Board.

The diary is preoccupied and recorded in: Sherpa/Romeo, Scholastic Resource Index, Academickeys, Index Copernicus, Google Scholar.
